**TROPOS NETWORKS AGAIN NAMED WORLDWIDE  
MARKET LEADER FOR WI-FI MESH NETWORKS IN 2007**

*Number One in Sales Revenue, Market Share, and Mesh Nodes Shipped  
According to Year-End Dell 'Oro Group Report*

**SUNNYVALE, CA** -- February 26, 2008 -- Tropos® Networks, the market leader in wireless IP broadband mesh networks, today announced that in 2007 the company maintained its leadership of the Wi-Fi mesh market in sales revenue, market share and units shipped worldwide, according to the Dell 'Oro Group's year end market report just published.

"We have continued to build upon our market and technology leadership to address the growing and evolving demand for reliable, wireless IP broadband infrastructures that can be used for multiple applications," said Denise Barton, director of marketing for Tropos Networks."

"Municipalities and other organizations use our solutions to improve the efficiencies of mobile workers and reduce operational costs. Cities most often use the networks for public safety – mobile police, fire and EMS vehicles; for fixed and mobile video surveillance; for utility automation, to reduce operational costs and improve billing accuracy. Industrial deployments are increasingly popular in harsh environments such as shipping ports and open pit mines where the network is used to improve business process efficiencies and reduce operating costs."

"Our focus and commitment to the outdoor Wi-Fi mesh market is clear which is why Tropos continues to lead in market share and sales, technology innovation and customer deployments. In 2008, we look

## Tropos Networks Again Named Worldwide Market Leader for Wi-Fi Mesh Networks in 2007

forward to working with our customers and partners to meet the needs of this exciting and growing market worldwide,” Barton concluded.

About Tropos Networks, Inc.

Tropos® Networks is the market leader in wireless IP broadband mesh networks enabling cities and other organizations worldwide to own and control smart, affordable, IP infrastructures for deploying high-value applications that improve the efficiencies of its mobile workers while reducing operational costs. These applications include mobile public safety (for police, fire and EMS vehicles), video surveillance, utility automation and industrial deployments. The patented Tropos MetroMesh™ system delivers the ultimate reliability, scalability, and security at low cost that is required for business critical and life saving wireless applications and is installed in over 30 countries. Founded in 2001, Tropos Networks is headquartered in Sunnyvale, California. For more information, please visit
